EDUCATION

Shri Ramdeobaba College of Engineering and Management, Nagpur
B.Tech – Computer Science and Engineering (AI/ML Specialization)

2022 – 2026
CGPA: 8.42/10

PROJECTS

E-Commerce Sales Analytics Dashboard

SQL, Power BI, Excel

- Built an interactive Power BI dashboard tracking revenue, orders, profit margin, customer segments, product categories, and regional performance.
- Wrote SQL queries using joins, CTEs, aggregations, date functions, and window functions to prepare clean analysis-ready datasets.
- Created KPI cards, trend charts, slicers, and repeat-purchase analysis to support sales performance review and business reporting.

Customer Churn Analysis and Retention Insights

Python, SQL, Tableau

- Analyzed customer behavior data to identify churn patterns across tenure, contract type, payment method, service usage, and support interactions.
- Performed data cleaning, missing value treatment, feature engineering, EDA, and correlation analysis using Pandas and NumPy.
- Built Tableau dashboards showing churn rate by customer segment and highlighted high-risk groups for targeted retention campaigns.

Banking Transaction Fraud Analytics

Python, SQL, Machine Learning

- Explored transaction-level banking data to detect suspicious patterns by amount, location, time, merchant type, and account behavior.
- Used SQL and Python for data extraction, outlier detection, class imbalance handling, and fraud-pattern visualization.
- Created risk indicators including unusual transaction frequency, high-value transaction spikes, and location mismatch signals.

Product Funnel and A/B Testing Analysis

SQL, Python, Statistics

- Analyzed user journey data across acquisition, signup, activation, purchase, and retention stages to identify major funnel drop-offs.
- Calculated conversion rate, retention rate, cohort trends, and segment-wise performance using SQL aggregations and Python analysis.
- Evaluated A/B test results using statistical significance checks and recommended the better-performing product variant.

TECHNICAL SKILLS

Languages:	SQL, Python, Java
Analytics:	EDA, Data Cleaning, KPI Analysis, Business Reporting, A/B Testing Basics
Libraries:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
BI Tools:	Power BI, Tableau, Excel, Power Query, Pivot Tables
Databases:	MySQL, PostgreSQL, SQL Joins, CTEs, Window Functions
Core CS:	Statistics, Machine Learning, DBMS, Data Structures and Algorithms

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**
- **Architecting Solutions on AWS** – Coursera
